

Tank Measurement and Environmental monitoring

ELS System

The main functions of the ELS System are measuring tanks and also environmental monitoring of your station. Its advanced technology offers the best precision in fuel measurement and the necessary safety to avoid environmental contamination. In addition, it provides real-time data and information about fuel stock, delivery notification, leak detection alerts, reports, and much more.

Tank Gauge

Printer thermal coupled

CEV-005 CONSOLE

It has a color touchscreen with several functions, such as real-time display of stock, temperature and water. Leak sensor status, event history and various reports

MAGNETOSTRICTIVE PROBE

Accuracy and security in measuring stock fuel at your station.

LEAK DETECTOR

Detects the presence of liquids in the sump and tank interstice, ensuring environmental protection.

Simple access and quick to stock of fuel

Manage your fuel stations in one place

Easy to install and configure

Online access through computers and cell phones

Universal Probe

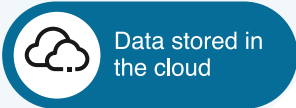

Universal Sensor

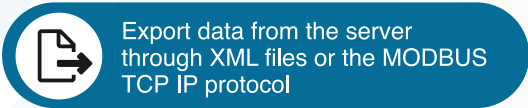

Anywhere, anytime with any device

The ELS System provides real-time access to data on your fuel stock and movement on our Web Platform or Mobile Application to all computers and cell phones.

Data stored in the cloud

Export data from the server through XML files or the MODBUS TCP IP protocol

Communicates and integrates with ERP system

Technology in the palm of your hand

Download the APP and quickly and safely obtain information about its stock and environmental monitoring

ADDITIONAL FEATURES

Fuel stock notifications and alarms, deliveries and alerts of leaks;

Reconciliation of fuel consumption and deliveries;

Optional output relay for activating submersible pumps;

Performs remote maintenance and software updates;

Automatic calibration of the fuel tank;

Current inventory reports, delivery history, ongoing events, fuel leak tests;

Connect up to 12 probes and 16 leak sensors (option with expansion board for more tanks);

Eliminates the need to take manual fuel measurements;

Measures fuel level, water level and temperature simultaneously;

Check the website for the various products and solutions we offer

Intelligent solutions and high quality products since 1990. Pioneers of 1 digital tire calibrator in the world, we conquered several markets and became the largest company in the Segment
